

Studio of Doriana & Massimiliano Fuksas of Rome

This is the headline of a new drive for Catalano, made by items specifically designed "for" high-quality architecture, made in "order to" stimulate and influence the architecture sector in which they are located. These items are designed by prestigious names in international architectural scene - together with Catalano - starting from Doriana and Massimiliano Fuksas in Rome and followed by other great designers.

Only a company that for over forty years constantly pursues innovation and quality can aspire to have exchanges with people who are shaping the image of the greatest cities in the world.
